

## Celebrating 30 years!

The NH Envirothon has been drawing students from all over the state since the spring of 1992!

**30 Years of connecting  
students to New Hampshire's  
Natural Resources**

## New Hampshire Conservation Districts

Your county conservation district helps local teams prepare for the competition too.

## The Competition

- ◇ A hands-on practical and academic competition that combines environmental challenges and sustainable societal needs (business, neighbors, land owners, recreation, etc.).
- ◇ Competitors accumulate life-long practical skills gained while solving real-world and timely outdoor issues in their state.
- ◇ Is hosted by NH Association of Conservation Districts with assistance and advice provided by Resource Team members and educators from various natural resource agencies and organizations.
- ◇ Each year, students compete in five Natural Resource areas: **Wildlife, Forestry, Aquatic Ecology, Soils and Land Use**, and a **Current Issue**.
- ◇ The current issue is a stand-alone research topic as well as included in each resource topic area.

**The top team advances to represent NH at the North American competition.**

## The Students

Join or start a team of five students who will work towards a **state-wide academic environmental competition** in May.

Five categories:

Soils  
Wildlife  
Aquatics  
Forestry

**2023 Current Environmental Issue -  
ADAPTING TO A CHANGING CLIMATE**

### Middle & High School Teams

Learn practical natural resource skills.  
Work outdoors. Enjoy nature. Learn from  
Natural Resource Professionals.

State competition: <http://nhenvirothon.org/>

National competition: <https://envirothon.org/>

## The Advisors

Are you someone who might like to coach a high school or middle school team?

Do you know teens who are interested in the outdoors - Forestry, Wildlife, Aquatics, Soils, and Current Environmental Issues in NH?

### Training is Available

Teams of Natural Resource professionals have developed training information, posted information and learning resources on the NHE website, and offer training workshops.

Training includes the use of the iNaturalist app, online watershed maps, the NHE website as well as engagement with their coach and Natural Resource professionals.

The NHE Program Coordinator is also available to answer questions, guide, and encourage you as you develop your team. Contact Margie Clark-Kevan at [admin@nhenvirothon.org](mailto:admin@nhenvirothon.org)
